MONTHLY TRUCK TONNAGE REPORT

FOR IMMEDIATE RELEASE FROM RESEARCH AND ECONOMICS DIVISION
AMERICAN TRUCKING ASSOCIATIONS, INC. 1616 P STREET, N. W. WASHINGTON, D. C. 20036 (202) 797-5422

SEPTEMBER TRUCK TONNAGE INDEX INCREASES

The seasonally adjusted monthly index of intercity truck tonnage increased 7.1 points (or 4.2 percent) during September 1979, the American Trucking Associations announced today. The adjusted index* was 176.8 for the month of September, compared to 169.7 for the month of August. The index was 7.5 points (or 4.1 percent) lower than it was in September 1978. The average month for tonnage during the year 1967 is taken as 100 to start the chain link index.

These findings are based on the ATA Research and Economics Division monthly survey of Class I and II motor carriers of general freight with monthly responses representing more than one-third of the tonnage moved. The month-to-month percent change chain link has been adjusted to remove the normal seasonal influences and the variations due to the different number of business days each month.

The unadjusted tonnage data for the United States and for each region are shown on the reverse side. Based upon this unadjusted data, September tonnage decreased 2.8 percent compared to August and decreased 9.1 percent compared to September of last year.

Culmative tonnage for the first nine months of 1979 decreased 0.7 percent from the same period in 19' ›.

*PLEASE NOTE: These tonnage index figures are based on month-to-month percentage change figures. This chain link index is then adjusted seasonally and for trading days according to formulae supplied yearly by the Department of Commerce. For more information on the techniques involved and the use of this index see the ATA Department of Economics "Motor Carrier Special Report" of September 1977.

RECEIVED
DEC 1979

OCTOBER TRUCK TONNAGE INDEX DECREASES

The seasonally adjusted monthly index of intercity truck tonnage decreased 4.6 points (or 2.6 percent) during October 1979, the American Trucking Associations announced today. The adjusted index* was 173.2 for the month of October, compared to 177.8** for the month of September. The index was 15.3 (or 8.1 percent) lower than it was in October 1978. The average month for tonnage during the year 1967 is taken as 100 to start the chain link index.

These findings are based on the ATA Research and Statistical Services Department's monthly survey of Class I and II motor carriers of general freight with monthly responses representing more than one-third of the tonnage moved. The month-to-month percent change chain link has been adjusted to remove the normal seasonal influences and the variations due to the different number of business days each month.

The unadjusted tonnage data for the United States and for each region are shown on the reverse side. Based upon this unadjusted data, October tonnage increased 8.7 percent compared to September and decreased 7.2 percent compared to October of last year.

*PLEASE NOTE: These tonnage index figures are based on month-to-month percentage change figures. This chain link index is then adjusted seasonally and for trading days according to formulae supplied yearly by the Department of Commerce. For more information on the techniques involved and the use of this index see the ATA Department of Economics "Motor Carrier Special Report" of September 1977.

**Revised and corrected.

AMERICAN TRUCKING ASSOCIATIONS, INC. 1616 P STREET, N. W. WASHINGTON, D. C. 20036 (202) 797-5422

NOVEMBER TRUCK TONNAGE INDEX DECREASES

The seasonally adjusted monthly index of intercity truck tonnage decreased 1.5 points (or 0.9 percent) during November 1979, the American Trucking Associations announced today. The adjusted index* was 171.7 for the month of November, compared to 173.2 for the month of October. The index was 14.5 (or 7.8 percent) lower than it was in November 1978. The average month for tonnage during the year 1967 is taken as 100 to start the chain link index.

These findings are based on the ATA Research and Statistical Services Department's monthly survey of Class I and II motor carriers of general freight with monthly responses representing more than one-third of the tonnage moved. The month-to-month percent change chain link has been adjusted to remove the normal seasonal influences and the variations due to the different number of business days each month.

The unadjusted tonnage data for the United States and for each region are shown on the reverse side. Based upon this unadjusted data, November tonnage decreased 12.1 percent compared to October and decreased 11.3 percent compared to November of last year.

*PLEASE NOTE: These tonnage index figures are based on month-to-month percentage change figures. This chain link index is then adjusted seasonally and for trading days according to formulae supplied yearly by the Department of Commerce. For more information on the techniques involved and the use of this index see the ATA Department of Economics "Motor Carrier Special Report" of September 1977.

MONTHLY TRUCK TONNAGE REPORT

FOR IMMEDIATE RELEASE FROM RESEARCH AND ECONOMICS DIVISION
AMERICAN TRUCKING ASSOCIATIONS, INC. 1616 P STREET, N. W. WASHINGTON, D. C. 20036 (202) 797-5422

DECEMBER TRUCK TONNAGE INDEX INCREASES

The seasonally adjusted monthly index of intercity truck tonnage increased 4.9 points (or 2.9 percent) during December 1979, the American Trucking Associations announced today. The adjusted index* was 176.6 for the month of December, compared to 171.7 for the month of November. The index was 20.5 points (or 10.4 percent) lower than it was in December 1978. The average month for tonnage during the year 1967 is taken as 100 to start the chain link index.

These findings are based on the ATA Research and Statistical Services Department's monthly survey of Class I and II motor carriers of general freight with monthly responses representing about one-third of the tonnage moved. The month-to-month percent change chain link has been adjusted to remove the normal seasonal influences and the variations due to the different number of business days each month.

The unadjusted tonnage data for the United States and for each region are shown on the reverse side. Based upon this unadjusted data, December tonnage decreased 4.5 percent compared to November and decreased 13.6 percent compared to December of last year. Cumulative tonnage for 1979 decreased 2.6 percent compared to the same period in 1978 for the carriers in the survey.

*PLEASE NOTE: These tonnage index figures are based on month-to-month percentage change figures. This chain link index is then adjusted seasonally and for trading days according to formulae supplied yearly by the Department of Commerce. For more information on the techniques involved and the use of this index see the ATA Department of Economics "Motor Carrier Special Report" of September 1977.

AMERICAN TRUCKING ASSOCIATIONS, INC. 1616 P STREET, N. W. WASHINGTON, D. C. 20036 (202) 797-5422

JANUARY TRUCK TONNAGE INDEX DECREASES

The seasonally adjusted monthly index of intercity truck tonnage decreased 10.8 points (6.3 percent) during January 1980, the American Trucking Associations announced today. The adjusted index was 161.8 for the month of January, compared to 172.6 for the month of December. The index was 31.9 points (or 16.5 percent) lower than it was in January 1979. The average month for tonnage during the year 1967 is taken as 100 to start the chain link index.

Special Note: Comparisons with adjusted index numbers for earlier periods are based on the Newly Revised Adjusted Monthly Truck Tonnage for the five years 1975 through 1979. These adjustments, which are included with this report as an attachment, reflect further refinements in the seasonal and trading day correction factors. It is suggested that the attachment be retained for future use.

These findings are based on the ATA Research and Statistical Services Department's monthly survey of Class I and II motor carriers of general freight with monthly responses representing more than one-third of the tonnage moved. The month-to-month percent change chain link has been adjusted to remove the normal seasonal influences and the variations dues to the different number of business days each month.

The unadjusted tonnage data for the United States and for each region are shown on the reverse side. Based upon this unadjusted data, January tonnage decreased 2.0 percent compared to December and decreased 12.9 percent compared to January of last year.

---

*PLEASE NOTE: These tonnage index figures are based on month-to-month percentage change figures. This chain link is then adjusted seasonally and for trading days according to formulae supplied yearly by the Department of Commerce. For more information on the techniques involved and the use of this index see the ATA Department of Economics "Motor Carrier Special Report" of September 1977.

REVISED ADJUSTED MONTHLY TRUCK TONNAGE

1967 = 100

The U.S. Department of Commerce has provided revised and refined adjustment factors covering seasonal and trading day corrections for the monthly truck tonnage index. Based on these improved factors, the adjusted monthly index numbers have been revised for the latest five years. In many instances, the resultant change is nominal although some adjustments were relatively large in the most recent year (1979).

Year-to-year changes for 1980 will be computed utilizing the revised series.

	1975	1976	1977	1978	1979
January	131.3	145.1	160.9	164.9	193.7
February	128.3	147.7	162.7	173.7	198.1
March	121.1	149.7	162.7	176.7	203.7
April	127.2	148.0	166.6	192.6	145.8
May	124.3	152.8	163.7	180.4	184.7
June	129.0	152.2	166.0	179.1	185.8
July	131.0	155.2	167.1	176.7	183.6
August	135.4	155.3	168.3	181.6	174.3
September	136.2	156.4	167.9	183.5	175.5

MONTHLY TRUCK TONNAGE REPORT

FOR IMMEDIATE RELEASE FROM RESEARCH AND ECONOMICS DIVISION
AMERICAN TRUCKING ASSOCIATIONS, INC. 1616 P STREET, N. W. WASHINGTON, D. C. 20036 (202) 797-5422

FEBRUARY TRUCK TONNAGE INDEX DECREASES

The seasonally adjusted monthly index of intercity truck tonnage decreased 8.0 points (4.9 percent) during February 1980, the American Trucking Associations announced today. The adjusted index was 153.8 for the month of February, compared to 161.8 for the month of January. The index was 44.3 points (or 22.4 percent) lower than it was in February 1979. The average month for tonnage during the year 1967 is taken as 100 to start the chain link index.

Special Note: The level of tonnage in February 1979 is believed to have been artificially elevated due to stockpiling by some shippers in anticipation of a possible work stoppage by the Teamsters union. This affects the year-to-year comparison.

These findings are based on the ATA Research and Statistical Services Department's monthly survey of Class I and II motor carriers of general freight with monthly responses representing more than one-third of the tonnage moved. The month-to-month percent change chain link has been adjusted to remove the normal seasonal influences and the variations dues to the different number of business days each month.

The unadjusted tonnage data for the United States and for each region are shown on the reverse side. Based upon this unadjusted data, February tonnage increased 0.1 percent compared to January and decreased 12.8 percent compared to February of last year.

---

*PLEASE NOTE: These tonnage index figures are based on month-to-month percentage change figures. This chain link is then adjusted seasonally and for trading days according to formulae supplied yearly by the Department of Commerce. For more information on the techniques involved and the use of this index see the ATA Department of Economics "Motor Carrier Special Report" of September 1977.

MONTHLY TRUCK TONNAGE REPORT

FOR IMMEDIATE RELEASE FROM RESEARCH AND ECONOMICS DIVISION
AMERICAN TRUCKING ASSOCIATIONS, INC. 1616 P STREET, N. W. WASHINGTON, D. C. 20036 (202) 797-5422

MARCH TRUCK TONNAGE INDEX INCREASES

The seasonally adjusted monthly index of intercity truck tonnage increased 1.7 points (1.1 percent) during March 1980, the American Trucking Associations announced today. The adjusted index was 157.3 (p) for the month of March, compared to 155.6 (r) for the month of February. The index was 48.1 points (or 23.1 percent) lower than it was in March 1979. The final adjusted index for January, 1980 was 163.5 (f). The average month for tonnage during the year 1967 is taken as 100 to start the chain link index.

Special Note: With this release, a major change has been incorporated into the monthly tonnage index. There is now included revised and final data for the preceding two months, based on the processing of additional reports from the motor carriers. Henceforth, the data for the latest month will be noted as "p" or preliminary, that for the immediately preceding month as "r" or revised, and that for two months earlier as "f" or final.

These findings are based on the ATA Research and Statistical Services Department's monthly survey of Class I and II motor carriers of general freight with monthly responses representing more than one-third of the tonnage moved. The month-to-month percent change chain link has been adjusted to remove the normal seasonal influences and the variations dues to the different number of business days each month.

The unadjusted tonnage data for the United States and for each region for the latest month (p) are shown on the reverse side. Based upon this unadjusted data, March tonnage increased 6.0 (p) percent compared to revised February and decreased 23.0 (p) percent compared to March of last year.

Cumulative tonnage for the first three months of 1980 decreased 16.3 (p) percent compared to the same period in 1979.

---

p - preliminary r - revised f - final

PLEASE NOTE: These tonnage index figures are based on month-to-month percentage change figures. This chain link is then adjusted seasonally and for trading days according to formulae supplied yearly by the Department of Commerce. For more information on the techniques involved and the use of this index see the ATA Department of Economics "Motor Carrier Special Report" of September 1977.

MONTHLY TRUCK TONNAGE REPORT

FOR IMMEDIATE RELEASE FROM RESEARCH AND ECONOMICS DIVISION
AMERICAN TRUCKING ASSOCIATIONS, INC. 1616 P STREET, N. W. WASHINGTON, D. C. 20036 (202) 797-5422

APRIL TRUCK TONNAGE INDEX DECREASES

The seasonally adjusted monthly index of intercity truck tonnage decreased 9.4 points (5.9 percent) during April 1980, the American Trucking Associations announced today. The adjusted index was 150.3p for the month of April compared to 159.7r for the month of March. The index was 4.5 points (or 3.1 percent) higher than it was in April 1979. The final adjusted index for February, 1980 was 155.5f. The average month for tonnage during the year 1967 is taken as 100 to start the chain link index.

Note: Tonnage in April of last year (1979) was artificially depressed due to union job actions during a part of the period.

These findings are based on the ATA Research and Statistical Services Department's monthly survey of Class I and II motor carriers of general freight with monthly responses representing more than one-third of the tonnage moved. The montn-to-month percent change chain link has been adjusted to remove the normal seasonal influences and the variations dues to the different number of business days each month.

The unadjusted tonnage data for the United States and for each region for the latest month (p) are shown on the reverse side. Based upon this unadjusted data, April tonnage decreased 10.6 percent compared to revised March and increased 8.8 percent compared to April of last year.

---

MONTHLY TRUCK TONNAGE REPORT

FOR IMMEDIATE RELEASE FROM RESEARCH AND ECONOMICS DIVISION
AMERICAN TRUCKING ASSOCIATIONS, INC. 1616 P STREET, N. W. WASHINGTON, D. C. 20036 (202) 797-5422

MAY TRUCK TONNAGE INDEX DECREASES

The seasonally adjusted monthly index of intercity truck tonnage decreased 12.4 points (8.2 percent) during May 1980, the American Trucking Associations announced today. The adjusted index was 138.1p for the month of May compared to 150.5r for the month of April 1980. The index was 46.6 points (or 25.2 percent) lower than it was in May 1979. The final adjusted index for March, 1980 was 159.7f. The average month for tonnage during the year 1967 is taken as 100 to start the chain link index.

These findings are based on the ATA Research and Statistical Services Department's monthly survey of Class I and II motor carriers of general freight with monthly responses representing more than one-third of the tonnage moved. The month-to-month percent change chain link has been adjusted to remove the normal seasonal influences and the variations due to the different number of business days each month.

The unadjusted tonnage data for the United States and for each region for the latest month (p) are shown on the reverse side. Based upon this unadjusted data, May tonnage decreased 6.8 percent compared to revised April and decreased 25.2 percent compared to May of last year.

MONTHLY TRUCK TONNAGE REPORT

FOR IMMEDIATE RELEASE FROM RESEARCH AND ECONOMICS DIVISION
AMERICAN TRUCKING ASSOCIATIONS, INC. 1616 P STREET, N. W. WASHINGTON, D. C. 20036 (202) 797-5422

JUNE TRUCK TONNAGE INDEX DECREASES

The seasonally adjusted monthly index of intercity truck tonnage decreased 1.6 points (1.2 percent) during June 1980, the American Trucking Associations announced today. The adjusted index was 137.6p for the month of June compared to 139.2r for the month of May 1980. The index was 48.2 points (or 25.9 percent) lower than it was in June 1979. The final adjusted index for April, 1980 was 150.7f. The average month for tonnage during the year 1967 is taken as 100 to start the chain link index.

These findings are based on the ATA Research and Statistical Services Department's monthly survey of Class I and II motor carriers of general freight with monthly responses representing more than one-third of the tonnage moved. The month-to-month percent change chain link has been adjusted to remove the normal seasonal influences and the variations dues to the different number of business days each month.

The unadjusted tonnage data for the United States and for each region for the latest month (p) are shown on the reverse side. Based upon this unadjusted data, June tonnage decreased 1.3 percent compared to revised May and decreased 26.9 percent compared to June of last year.

Cumulative tonnage for the first six months of 1980 decreased 15.0p percent compared to the same period in 1979.

---

MONTHLY TRUCK TONNAGE REPORT

FOR IMMEDIATE RELEASE FROM RESEARCH AND ECONOMICS DIVISION
AMERICAN TRUCKING ASSOCIATIONS, INC. 1616 P STREET, N.W. WASHINGTON, D. C. 20036 (202) 797-5390

JULY TRUCK TONNAGE INDEX DECREASES

The seasonally adjusted monthly index of intercity truck tonnage decreased 4.1 points (2.9 percent) during July 1980, the American Trucking Associations announced today. The adjusted index was 136.2p for the month of July, compared to 140.3r for the month of June 1980. The index was 47.4 points (or 25.8 percent) lower than it was in July 1979. The final adjusted index for tonnage during the year 1967 is taken as 100 to start the chain link index.

These findings are based on the ATA Research and Statistical Services Department's monthly survey of Class I and II motor carriers of general freight with monthly responses representing more than one-third of the tonnage moved. The month-to-month percent change chain link has been adjusted to remove the normal seasonal influences and the variations dues to the different number of business days each month.

The unadjusted tonnage data for the United States and for each region for the latest month (p) are shown on the reverse side. Based upon this unadjusted data, July tonnage decreased 7.4 percent compared to revised June and decreased 21.8 percent compared to July of last year.
